

## Delivery Performance Dashboard

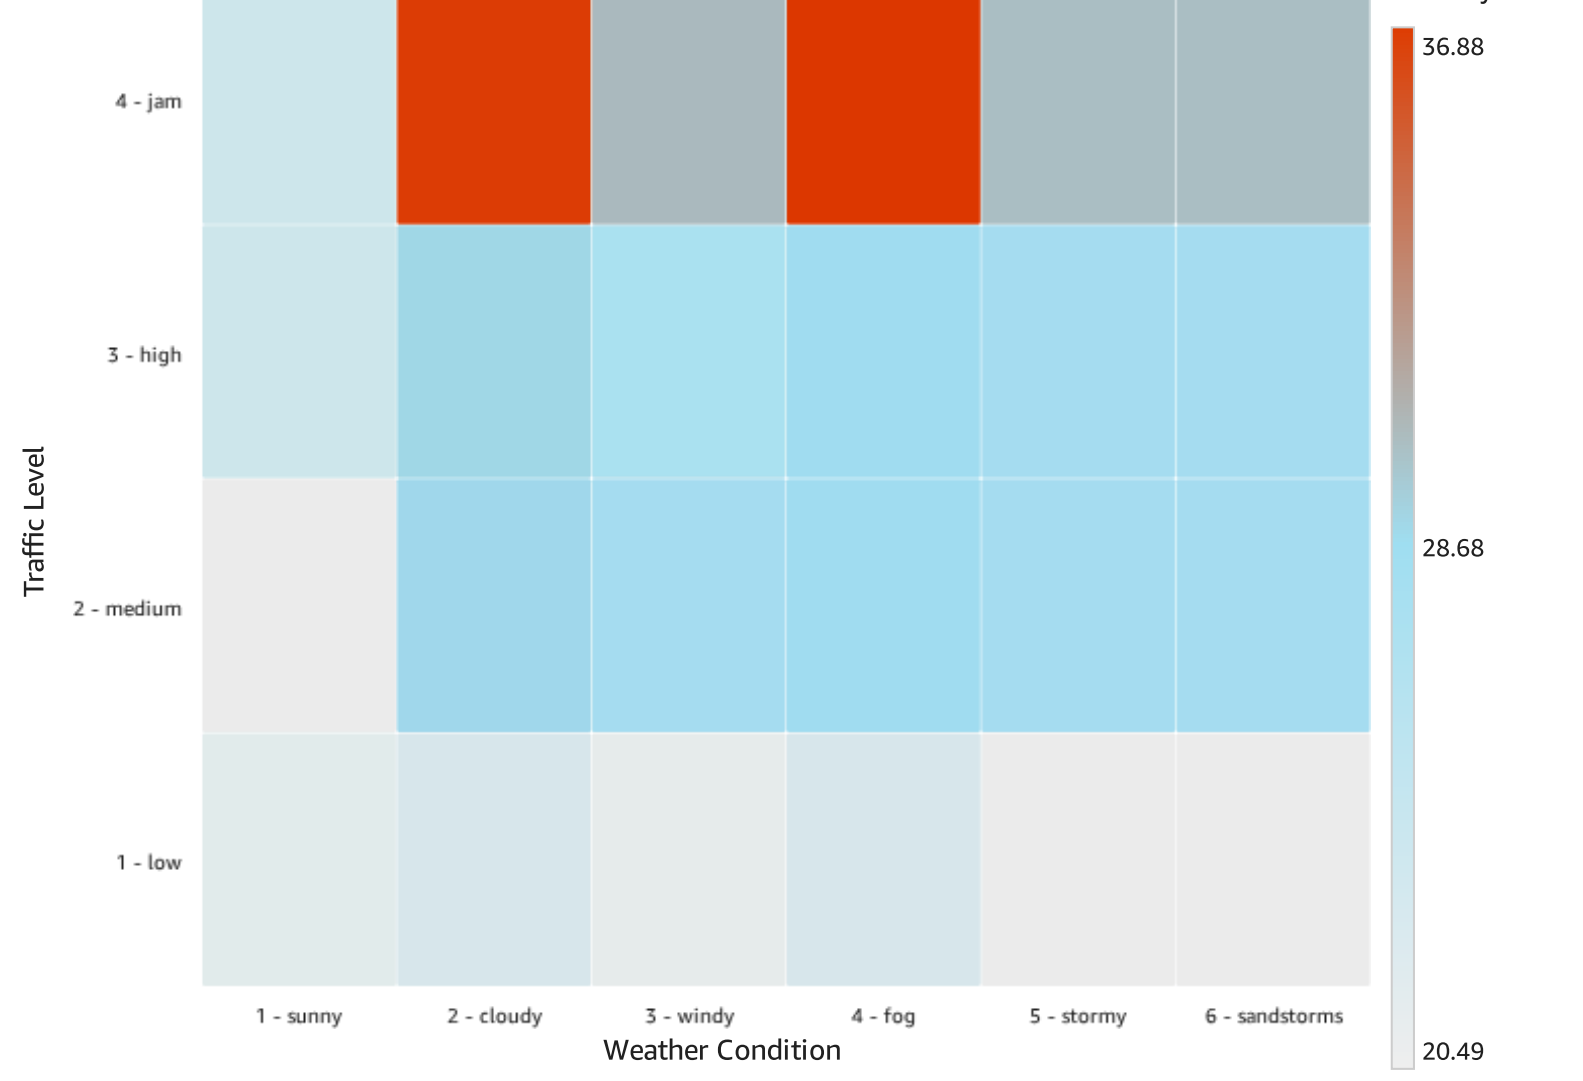

### Average Delivery Time by City

Compares how delivery times vary across urban, semi-urban, and metropolitan locations.

### Combined Impact of Traffic and Weather on Delivery Time

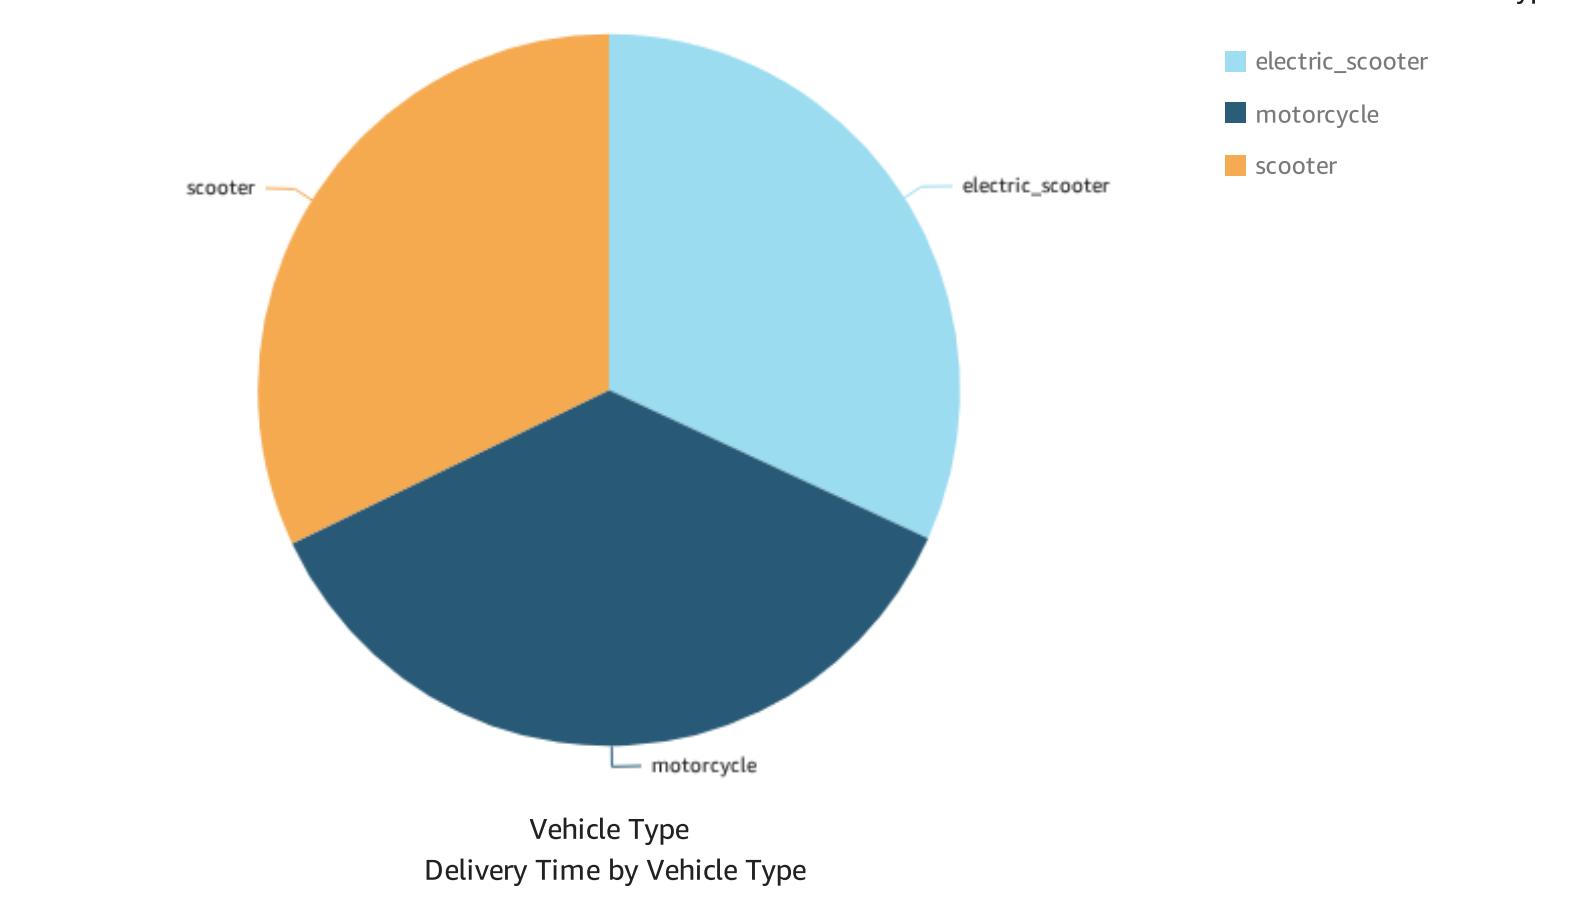

Visualizes how varying traffic conditions and weather types affect total delivery time. Sorted for clearer comparison.

### Delivery Time by Vehicle Type

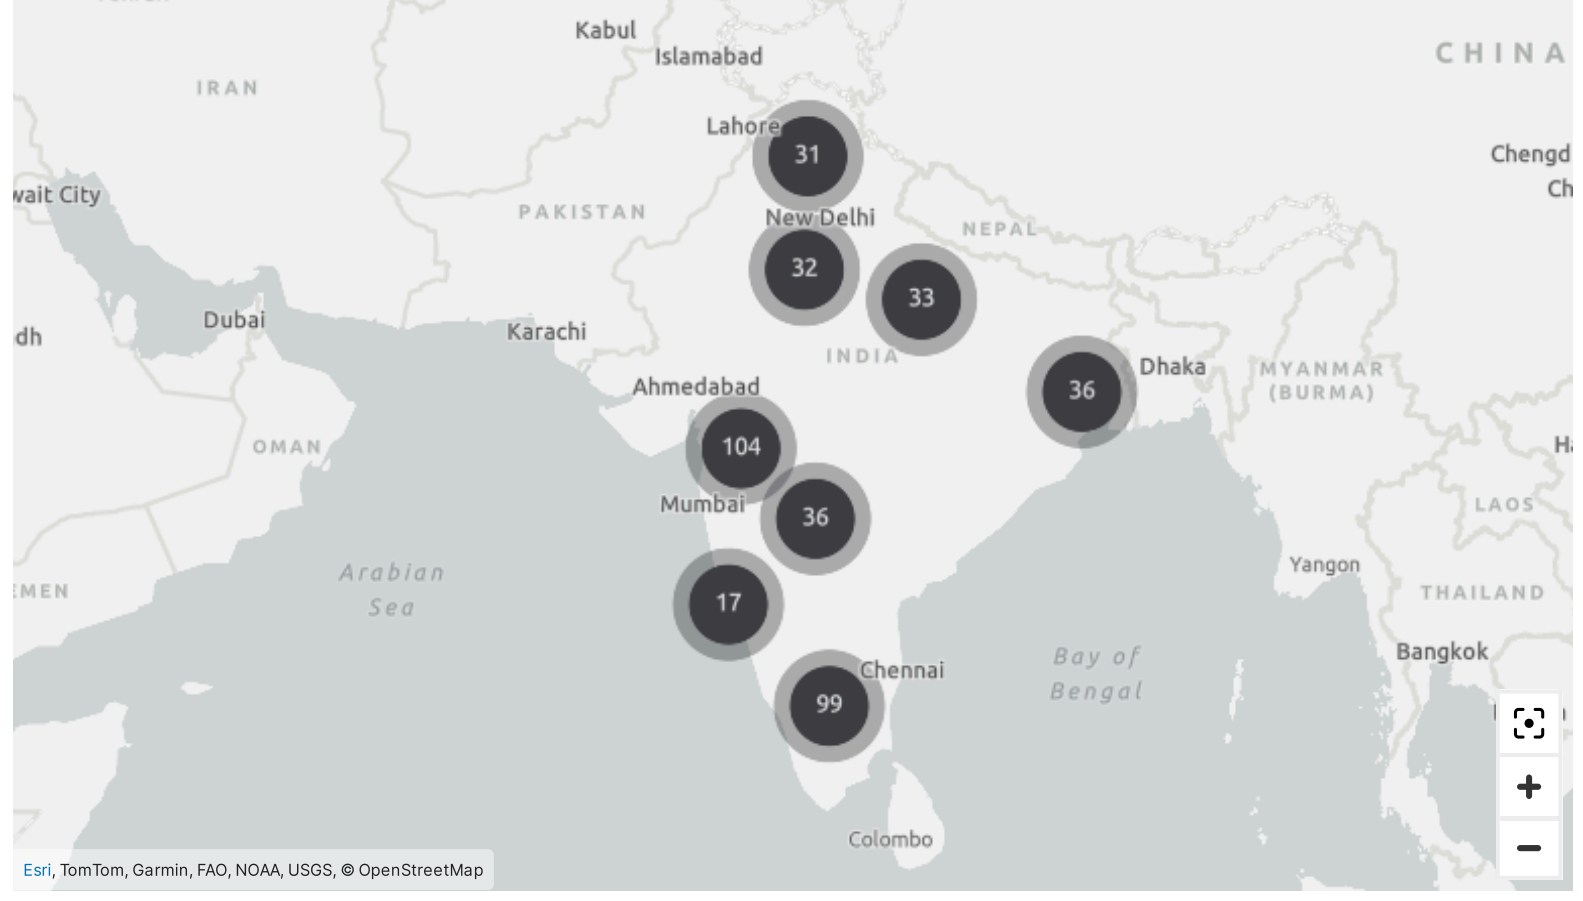

Shows the proportion of total delivery time based on the type of vehicle used.

Order Details Vehicle Type

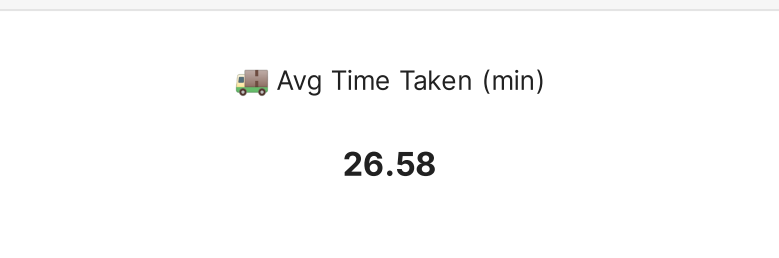

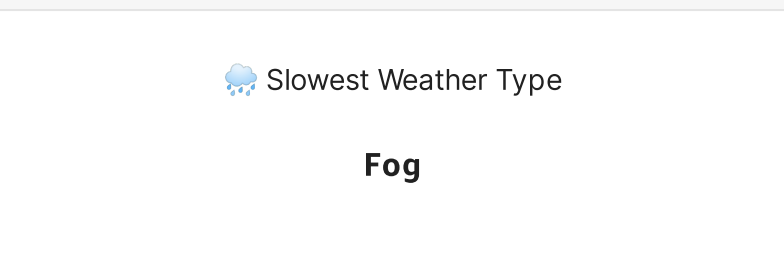

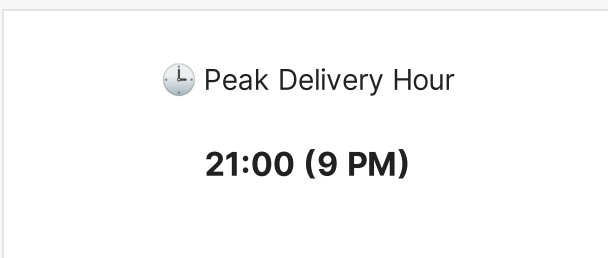

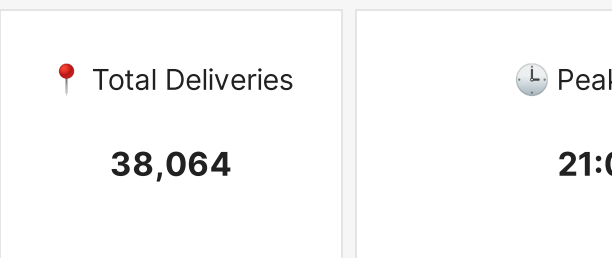

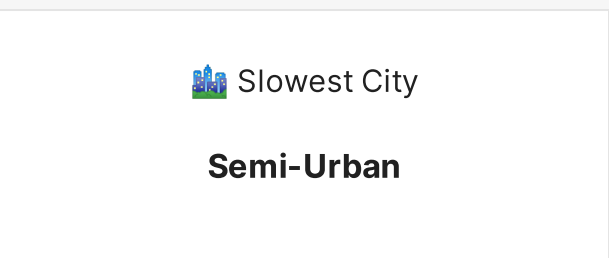

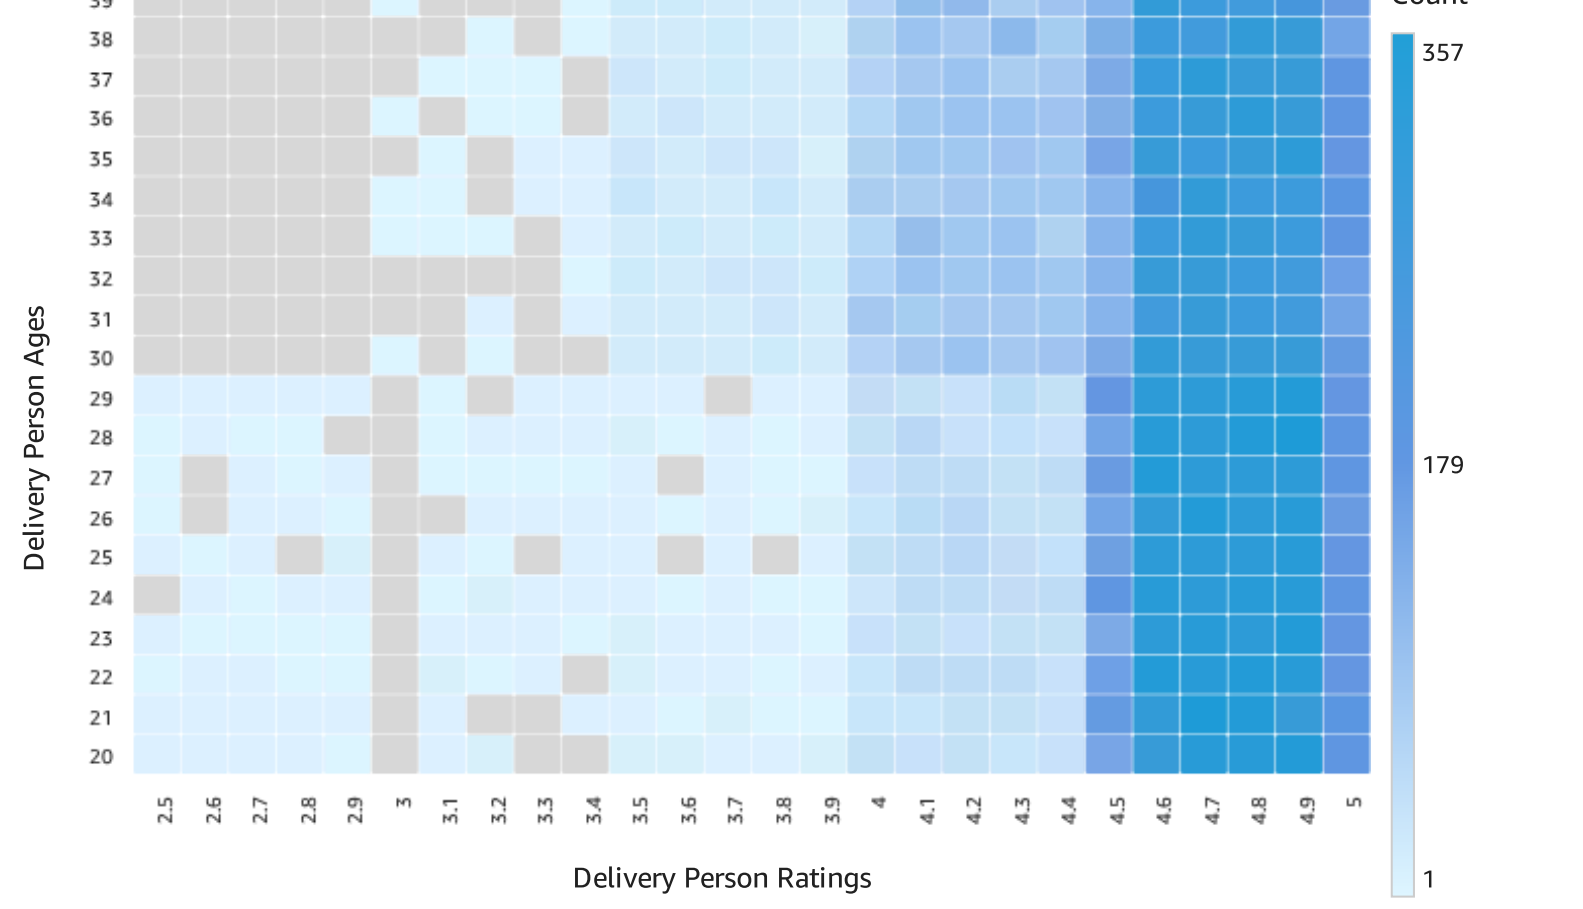

## Restaurant Locations

Visualizes the source locations (restaurants) for the deliveries.

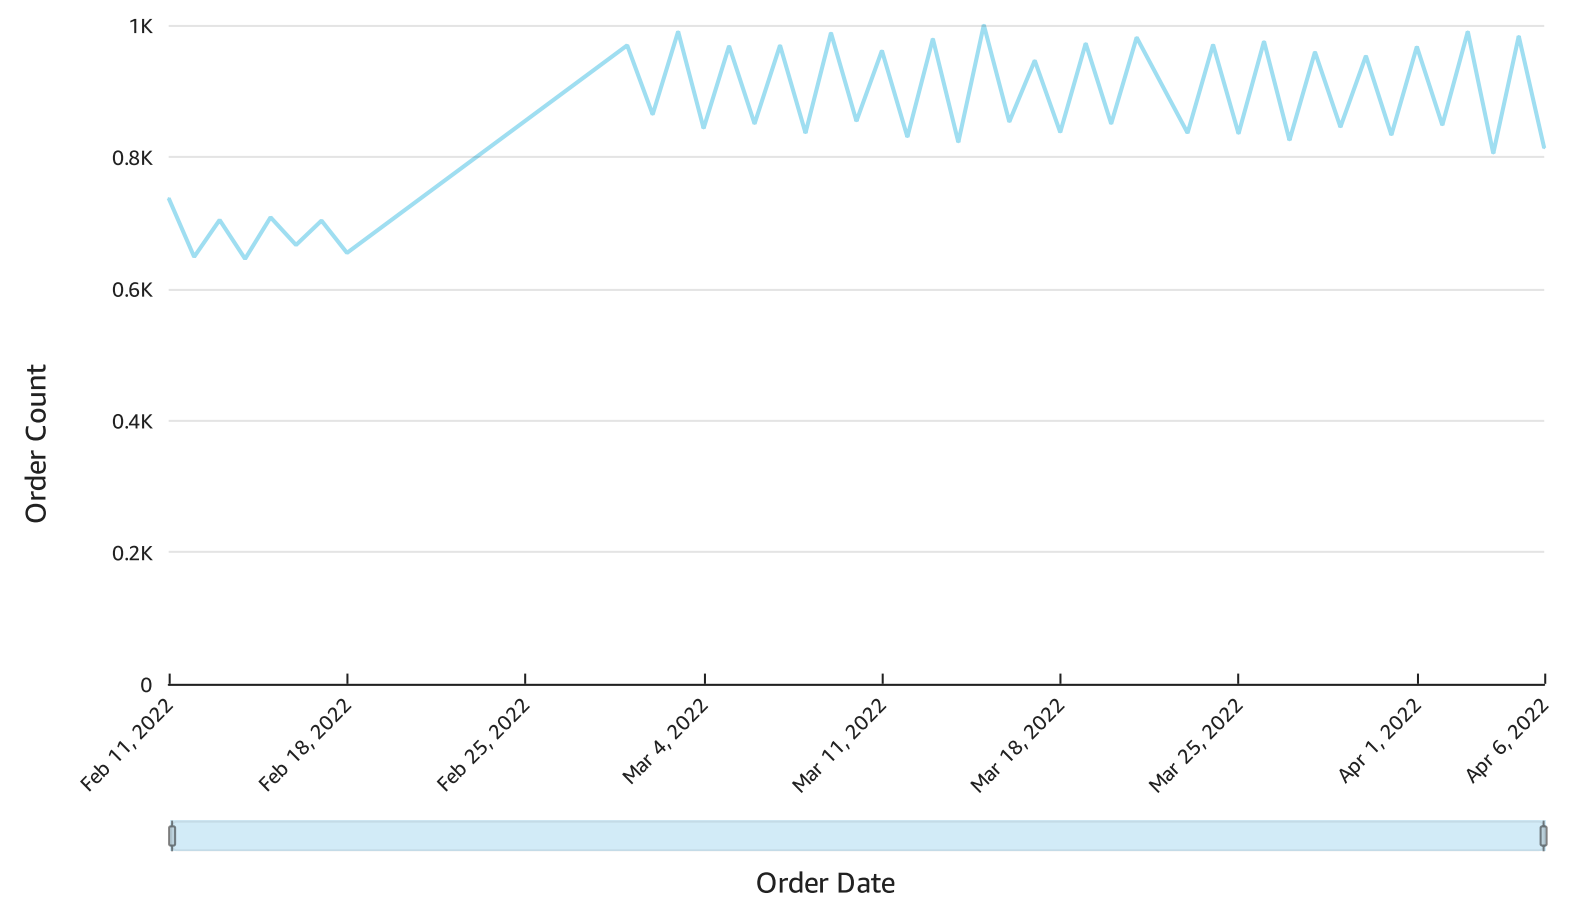

### Ratings by Delivery Person Age

Highlights rating distribution across different age groups of delivery personnel.

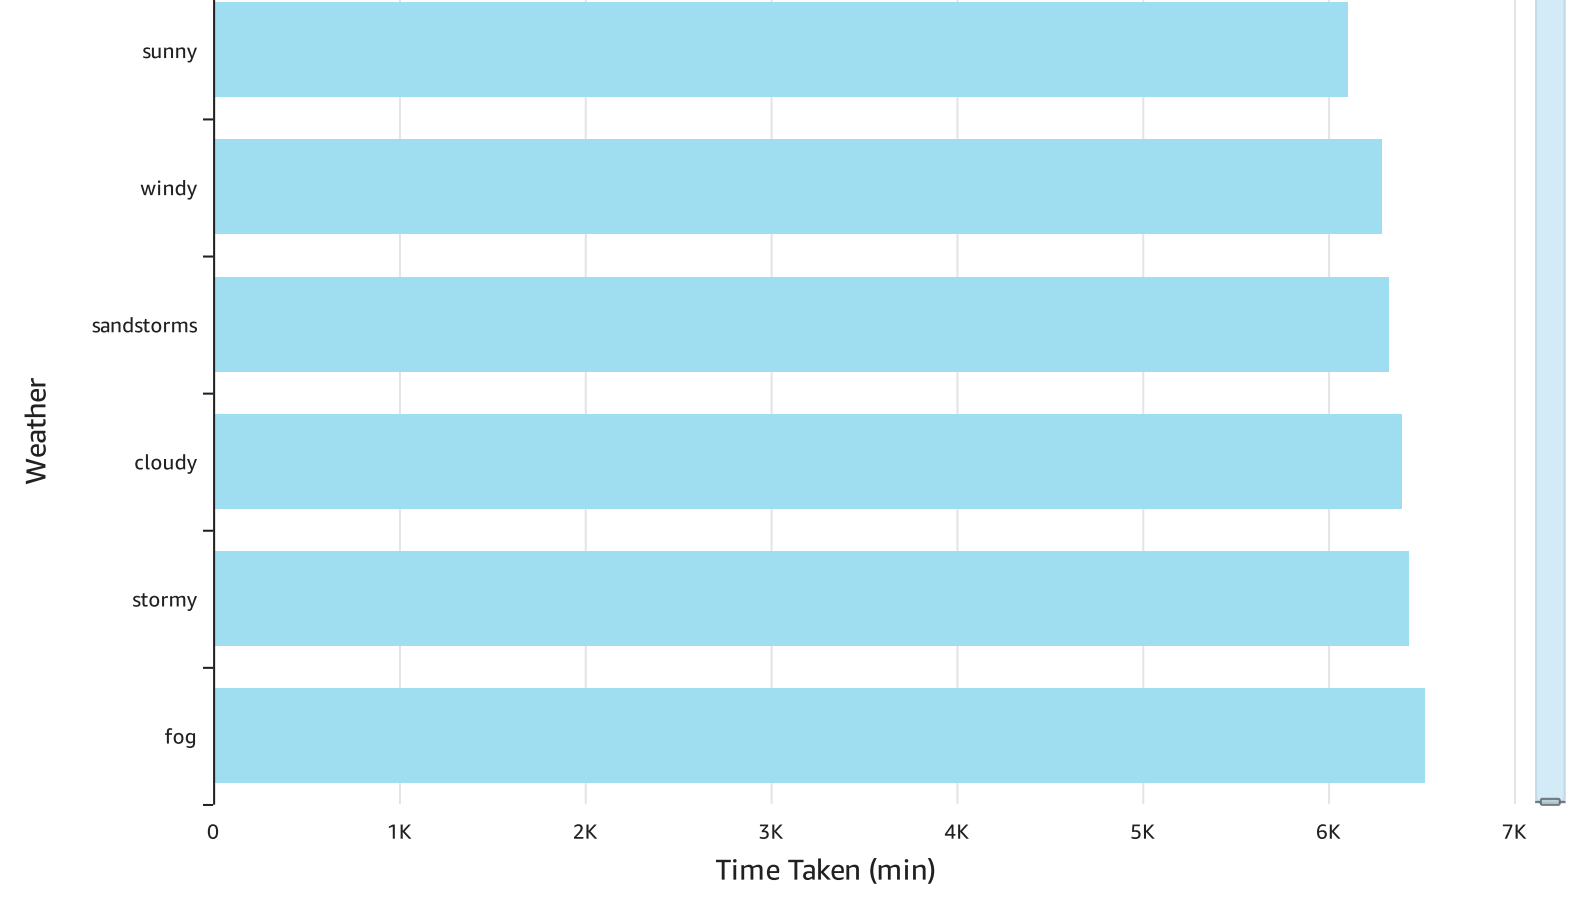

### Delivery Volume Over Time

Tracks how the number of deliveries fluctuates by order date.

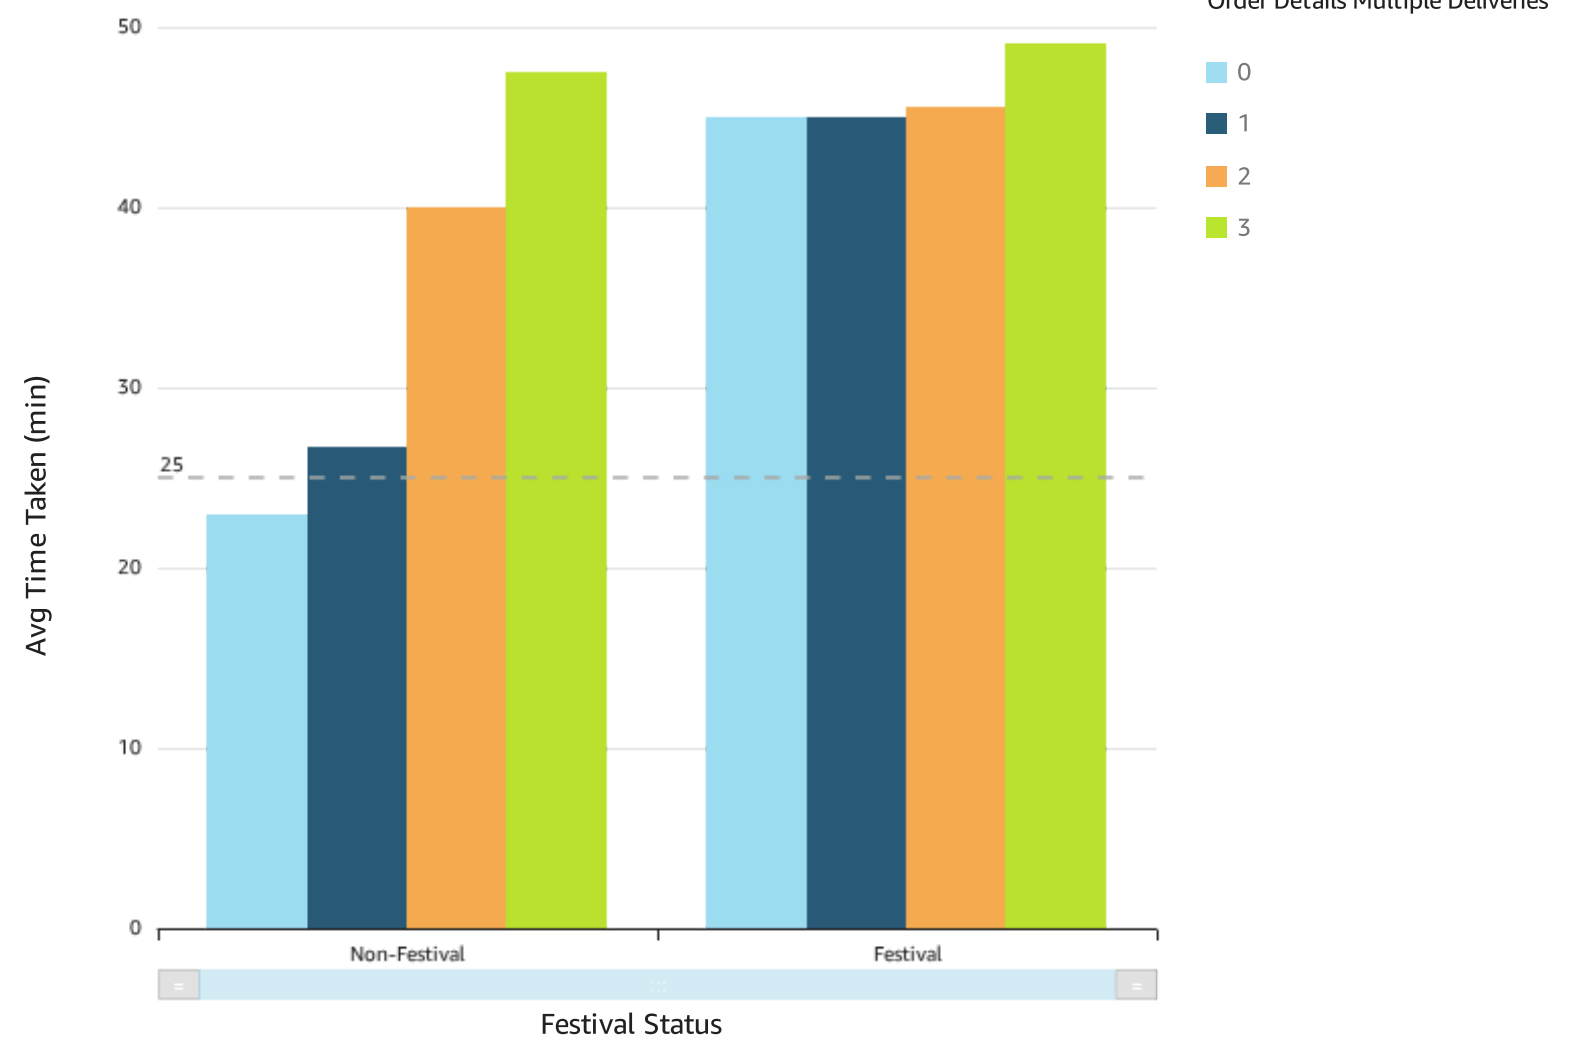

### Effect of Weather on Delivery Time

Displays how different weather conditions impact delivery durations.

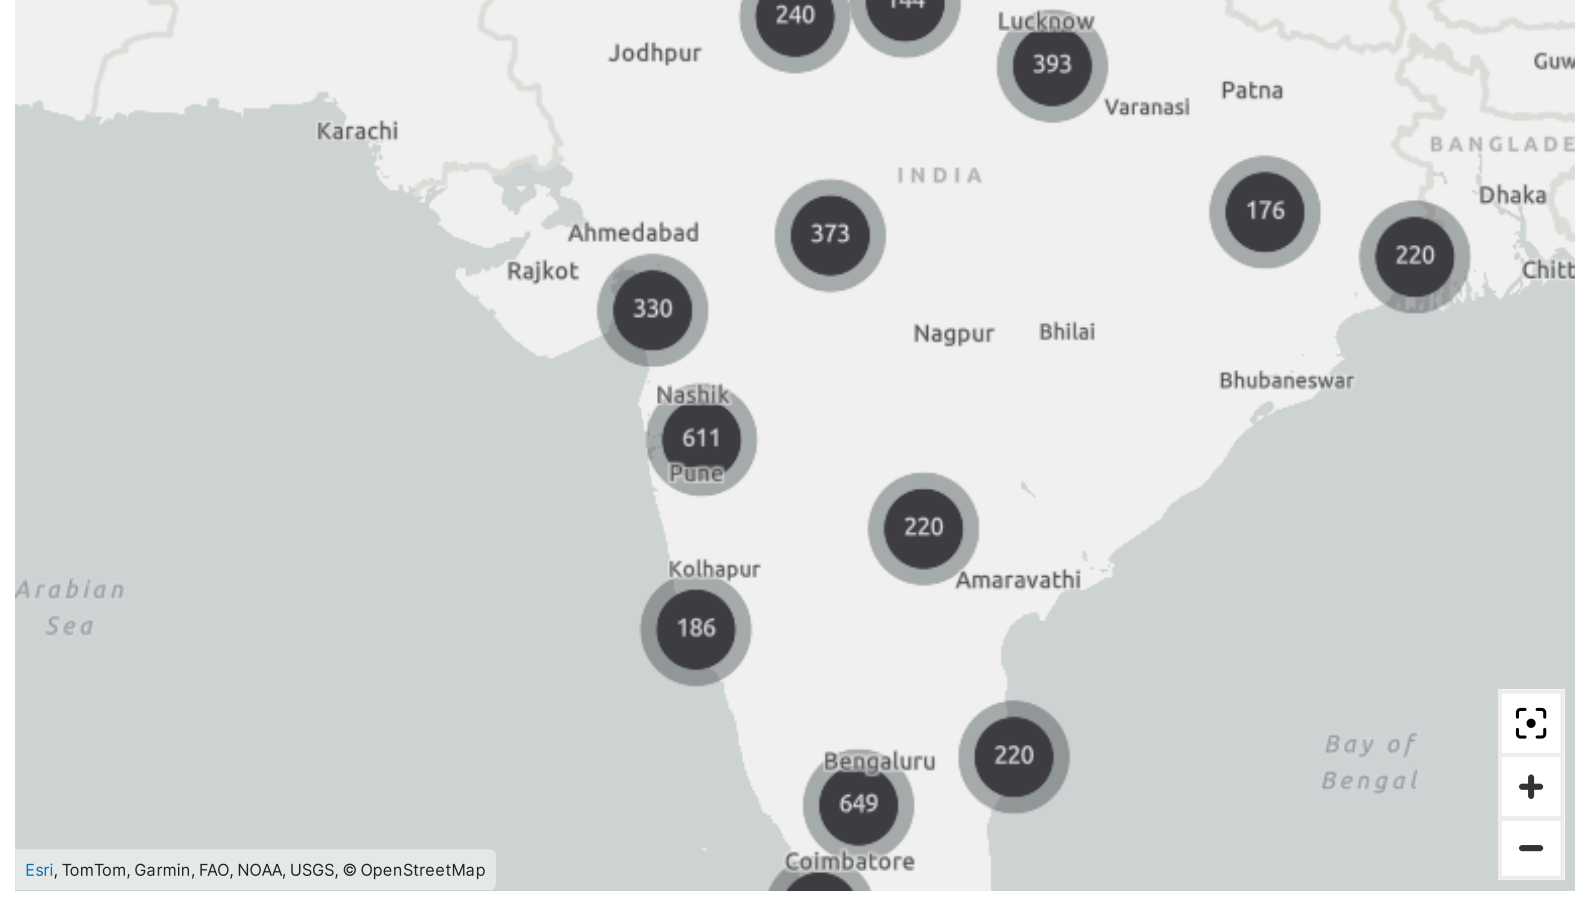

### Impact of Festival and Multiple Deliveries on Time Taken

Order Details: Multiple Deliveries

**Delivery locations**

Geographical distribution of where orders were delivered.

### Delivery Volume by Hour of the Day

*Analyzes how delivery activity fluctuates over the course of the day, based on the time orders were picked up.*
